

You Can Count On Us To Deliver The Best System To Meet Your Needs.

Let Rupp Air Management Systems' 35 years of experience help you solve your heating and ventilation needs. With our easy to use sizing and selection software we can quickly answer your needs and ensure a superior design.

Industrial & Commercial High Efficiency Direct Fired Gas Systems

- Tempered Make-Up Air
- Warehouse Heating
- Variable Air Volume
- Building Pressure Control
- High Temperature Curing
- Paint Booth

Modular Make-Up Air Systems

- Untempered Air Handler
- Direct Fired
- Indirect Fired
- Hot Water
- EVAP, Chilled Water, DX Cooling
- Electric Heat
- Mixing Boxes
- Variable Air Volume

Ventilation Systems

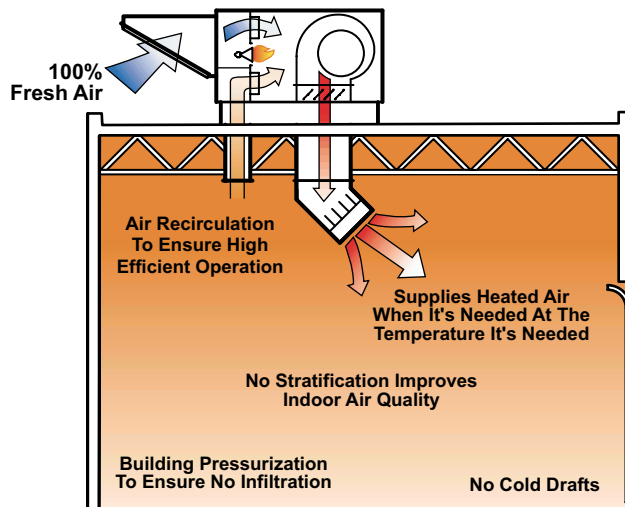

- Up-Blast Centrifugal
- Down-Blast Centrifugal
- Axial / Radial
- Ceiling
- General Purpose
- Prop
- Square In-Line
- Utility Sets
- Supply Fans

The Ultimate Warehouse Heating System Designed For Total Comfort & Energy Efficiency.

Rupp Air's "Total Heat System" is designed to produce the most efficient heating option available for commercial and industrial use today. By continuously introducing variable amounts of fresh air over a 100% thermal efficient direct-fired burner, along with turning over the unused heated air in the space, this system will eliminate cold drafts, temperature stratification, and stale air build up due to inadequate ventilation. This highly efficient system has been developed over the years to provide your shop, warehouse, garage or industrial facility with year round comfort and energy savings.

Rupp Air Systems

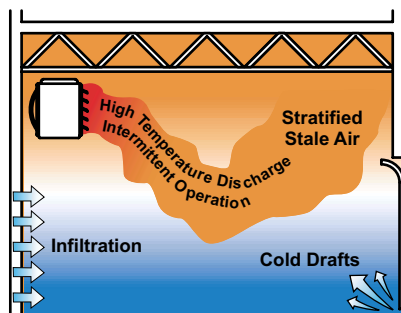

Heating Benefits

- Delivers 100% of the BTUs to the Space Ensuring the Highest Efficiency
- 100% Thermal Efficient Direct-Fired Burner
- 100% Fresh Air for Burner Combustion
- 30:1 Fully Modulating Burner
- Return Air Never Passes Across Burner

Air Movement Benefits

- Captures Heat Trapped at Ceiling Level, to Increase Efficiency
- Continuous Air Movement to Ensure Constant Comfort
- Continuous Positive Pressure Eliminates Infiltration and Cold Drafts
- Eliminates Stratification of Air for Uniform Temperature Throughout Building
- Continuous Outside Air to Improve Inside Air Quality

Conventional Heat System

Engineered For You

- ETL Tested and Labeled to Ensure Safety
- Optional Accessories to Meet Your Needs
- Over 10 Different Arrangements to Meet Your Application
- Temperature Controls Designed to Meet Your Application
- Easy to Install for Lower Up-Front Costs
- Easy to Service with Double Wall Access Doors to All Controls and Components
- Easy to Trouble Shoot with Step-By-Step Wiring Diagrams
- G-90 Galvanized Casing Design for Long Life Cycle of Equipment
